- Language Arts- Spelling Homework Daily using Choice Board
- Science- As needed

LET'S GO ASTROS!

Imagine Learning

Imagine Language & Literacy

Helping your student succeed at school and at home

Dear Parent or Caregiver,

Welcome! Your student has been enrolled in Imagine Language & Literacy for the new school year! Imagine Language & Literacy is an adaptive, interactive program that teaches language and literacy concepts at your student's level and helps them practice what they've learned. To learn more about Imagine Language & Literacy, visit www.imaginelearning.com/programs/language-and-literacy.

Your Student's Experience in Imagine Language & Literacy

Imagine Language & Literacy uses engaging, interactive games, books, songs, and videos to teach language and literacy concepts like letters and sounds, rhyming, vocabulary, spelling, reading comprehension skills, and more. When your student starts in Imagine Language & Literacy, they take a Benchmark Assessment (chosen by your school district) which identifies their current skill level and places them on their own personalized learning path. As your student uses Imagine Language & Literacy, it adapts to their performance level, helping them learn and practice the skills they need.

When your student answers questions correctly, they earn virtual tokens to play additional games, spend time in the Imagine Language & Literacy reward environments, and customize their avatar. Imagine Language & Literacy also provides audio language support in 15 languages to help English language learners.

Imagine Learning

Using Imagine Language & Literacy at Home

Your student can access Imagine Language & Literacy in a web browser from any computer or tablet (no smartphones) by logging in with the URL and login information below. Or you can download the Imagine Learning Student application to Chromebooks from the [Chrome Web Store](#), to iPads from the [App Store](#), and to Android devices from [Google Play](#) and [Amazon](#).

Check support.imaginelearning.com/imagine-language-literacy/system-requirements to ensure your computer or tablet meets the minimum technical requirements. To maintain your student's unique, personalized learning path and report accurate growth and progress, only students who are officially enrolled in Imagine Language & Literacy should use it from home.

Supporting Your Student's Progress

You can help your student succeed by being involved in their Imagine Language & Literacy experience. Follow these recommendations to get the most out of Imagine Language & Literacy this school year:

- **Encourage your student to use Imagine Language & Literacy at home.** Provide a distraction-free workspace and encourage your student to be thoughtful and attentive as they play the interactive activities.
- **Review any stories or printouts that your student brings home from school.** Ask your student to read the stories aloud to you and review the skills taught in any printouts.
- **Review your student's progress with their teacher.** Discuss your student's overall progress and growth, test results, performance predictions for state tests, and skill areas where your student may be struggling.
