

 **Bless You Allergy
& Asthma, P.A.**

**IS NOW OFFERING
ORAL
IMMUNOTHERAPY
for Food Allergy Patients**

What is it?

Oral immunotherapy is a method of inducing the immune system to tolerate a food that it is currently allergic to. It involves re-introducing the allergenic food in gradually increasing amounts, with the goal of allowing a patient to eventually consume the food without experiencing a reaction.

**Foods available
for
desensitization:**

Peanut

Walnut
